SINK REVEAL OPTIONS

NEGATIVE REVEAL: The countertop edge extends over the edge of the sink, hiding the sink rim.

NOTE: A 1/8" Negative Reveal is Classic Rock's standard reveal. If you would prefer any other reveal you need to notate that in the appropriate space on the confirmation sheet.

POSITIVE REVEAL: The countertop edge sits back from the edge of the sink, exposing the sink rim.

NOTE: not all sinks allow the option of a Positive Reveal, if the sink rim is unfinished this reveal will not look correct.

EQUAL/FLUSH REVEAL: The countertop edge and the edge of the sink are APPROXIMATELY equal.

****Due to the nature of quartz/natural stone an absolutely equal reveal cannot be expected.****
